

## FACTORS IN GLOBAL CLIMATE CHANGE

In this assignment, you will research one of the following. The topic you research will be assigned to you.

Earth's Tilt, Rotation, and revolution around the sun	Climate Zones
Coriolis Effect	Prevailing Winds
Jet Streams	Ocean Currents
Hydrosphere	Solar Energy
Clouds	Land Masses

With your group you will create an informational poster for your fellow students *to* learn from (Make it easy to understand and with lots of useful images that help you explain).

***Things to include on your poster:***

- What your topic is?
- How does it work?
- How does it influence or create weather around the world.

Your poster is due at the end of class tomorrow.

My Topic is: \_\_\_\_\_

My Partner is: \_\_\_\_\_

## Research Steps/Self-assessment

1. Decide who will research what?

I will research \_\_\_\_\_

My partner will research \_\_\_\_\_

2. Summarize your research

3. Decide how you will layout and design your poster

I will do \_\_\_\_\_

My partner will do \_\_\_\_\_

4. Self-Reflection. Consider the following.

Did we accomplish our goal and answer our question?

What could we do differently next time?

What did we learn?
