## **Development of THE CELL THEORY**

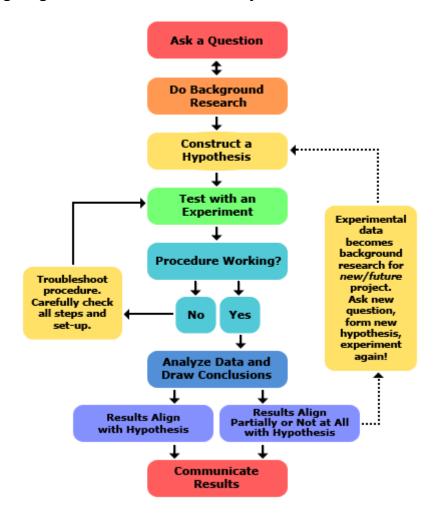

The following is known as the *cell theory:* 

- 1. All organisms are comprised of cells (Schleiden: plants; & Schwaan: animals, 1838)
- 2. The cell is the basic structure in all living things (Schleiden: plants; & Schwaan: animals, 1838)
- 3. All cells come from pre-existing cells (Virchow, 1858)

## Experiment # 1

The following diagram is known as the scientific method:

## **YOUR TASK:**

Design and execute an experiment that strictly adheres to the "scientific method," including a question, research, a hypothesis, a test with observable/measureable data, a conclusion that supports or refutes your hypothesis, improvements/suggestions and a summary.

You must either:

a) Add to the body of evidence that supports the cell theory

Or

b) Disprove the cell theory
