## Oh Deer! Results

| Round | \# Deer | \# Elements | \# Wolves |
| :--- | :--- | :--- | :--- |
| 1 |  |  |  |
| 2 |  |  |  |
| 3 |  |  |  |
| 4 |  |  |  |
| 5 |  |  |  |
| 6 |  |  |  |
| 7 |  |  |  |
| 8 |  |  |  |
| 9 |  |  |  |
| 10 |  |  |  |
| 11 |  |  |  |
| 12 |  |  |  |
| 13 |  |  |  |
| 14 |  |  |  |
| 15 |  |  |  |
| 16 |  |  |  |
| 17 |  |  |  |
| 18 |  |  |  |
| 20 |  |  |  |

1. Create a line graph to display all 3 pieces of information. Be sure that your axis are clearly labelled with units and your graph has a title. You will have to have a way to distinguish between the three lines of your graph.
2. Written response - What do you think would happen if we introduced a hunter into the game? The hunter can take two wolves per round. What effect would this have on the deer, elements, and ultimately the entire ecosystem? Create a response that is a minimum of 250 words.
