

Population Ecology Video Questions

1. What is a population?
2. What affects population density?
3. What is meant by the concept of *dispersion*?
4. What *limiting factors* slow population growth?
5. What is the definition of *carrying capacity*?
6. What is the difference between *exponential* and *logistic* growth?
7. The default growth curve for a population is: _____

**** Please draw a two representative graphs below:**

- a) Exponential growth curve with time on the x axis and population on the y axis
- b) Logistic growth curve with time on the x axis and population on the y axis
