

### **The Real Threat to Life on Earth**

---

1. What is hidden water?
2. What is happening to the global population density?
3. What behavioural changes are need to support our increasing population?
4. Do you agree with what the scientist is going to teach his son? Is this the only real solution? Why is this
5. What is your solution to the situation we face? How are you going to contribute to this solution?
6. Any last thoughts/comments on the Article(the things you highlighted)?
